Hi,

The Business Manager International Blog is where you will find regular useful hints and tips on technology, business and managing people. Over the coming months you can expect to see a series of blog entries ranging from how to get the most out of your website, including:

- Search Engine Optimisation
- Google Adwords
- Google Analytics

I have created a new support section to the website which includes frequently asked questions and a support ticketing system. This system will be used to submit support calls for:

- Billing
- Sales
- Technical Support

Over the last 3 months I have put in place a new online billing system for domains and hosting. Although these are separate billing systems the hosting is utilising a server located in the United States. This server is very fast and offers much easier configuration of options for our customers.

I hope you continue to visit this blog. Please ensure you subscribe to the newsfeed to be alerted when the blog is available.

Regards,
Ben Calder
